

We will be reviewing group 136 for assignment 2.

Do images filter correctly when clicking names?

The images filter correctly, when clicking on a name only the images that correspond to that author appear on the screen. After adding a new author, their names can also be filtered. Overall, very good job.

Image	Author	Tags	Alt	Description
	Ken Thompson	Image of Thompson	prof,man,smart	Ken Thompson did stuff with computers.
	Ken Thompson	Image of Thompson	prof,man,unix	Another image of Ken Thompson.
	Ken Thompson	Image of Thompson	chess,unix	Ken was on the forefront of chess computers.
Image URL	author	alt	tags	description

What happens when you "unclick" a name?

After selecting a name, if you click it again, all images show up, which is what is supposed to happen. It also works with after adding a new author. Well done.

Image	Author	Tags	Alt	Description
	Grace Hopper	Image of Grace Hopper at the UNIVAC I console	programming,linking,navy	Grace was very curious as a child; this was a lifelong trait. At the age of seven, she decided to determine how an alarm clock worked and dismantled seven alarm clocks before her mother realized what she was doing (she was then limited to one clock).
	Enrico Fermi	Image of Fermi	prof,manhattan,smart	Long description of image of Fermi.
	Otto Hahn	Image of Hahn	prof,man,smart	Long description of image of Hahn.
	Robert Oppenheimer	Image of Oppenheimer	prof,man,smart	Long description of image of Oppenheimer.
	Werner Heisenberg	Image of Heisenberg	chemistry,physics	This isn't actually Werner Heisenberg but who reads these long descriptions anyway.
	Ken Thompson	Image of Thompson	prof,man,smart	Ken Thompson did stuff with computers.
	Ken Thompson	Image of Thompson	prof,man,unix	Another image of Ken Thompson.
	Ken Thompson	Image of Thompson	chess,unix	Ken was on the forefront of chess computers.
	Tim Berners-Lee	Image of Berners-Lee	html,http,url,cern,mit	The internet and the Web aren't the same thing.
	Tim Berners-Lee	Image of Berners-Lee	www,internet	TimBL works at MIT nowadays.

Has the bonus been implemented? If so, does the bonus work correctly, also when clicking names etc.?

The search bar works for the most part. You can search for the author names, and it will work fine but it only works for author names – it will not work with descriptions, alts, or tags. After using the search bar you can also click the author's name and it will display it properly, only issue is that after deselecting this author all names appear disregarding what was in the search bar originally.

Search for author name:

Submit

How does their modal form work?

There is a modal on navigation bar, which works fine. We recommend deleting the form on the last row of the table as it doesn't contribute to web page's functionality.

Image URL	author	alt	tags	description
Submit				
Reset Database				

Can you update, reset, and upload new images?

There is no update button. Clicking on the reset button does indeed reset the database but the user must reload the page manually for it to be displayed. Adding images does work but after clicking submit the page jumps to the raw json page, the user must go back to the previous web page and then reload it for the image to be displayed. After testing, different authors, names, alts, tags and descriptions are displayed correctly, but the images don't load.

```

Is their gallery content properly dynamic, e.g. is the content data loaded from the server?

Yes, all the data is loaded from the server correctly no issues here.

Does submitting new images work on a single page, and does the new image show up without a reload?

Answer to question 5 describes image submitting.

Conclusion:

It was an interesting project to give feedback on. While there is still space for improvement, we clearly see the progress the group has made and the previous flaws they have fixed. We suggest making the images larger (as this is a photo album) and removing text where it's not needed. Overall, we had an opportunity to look at the same assignment from different group's perspective and have learned how different implementations of code give similar results. The group did a pretty good job!
